Test: Summary of Section 508, 1194.22 Compliance

Date: December 16, 2004

Prepared by: Lloyd Tribley

Description

The myabilities.org/ URL was tested for Section 508, 1194.22 compliance. Three critical issues were discovered. These issues apply to all pages on the site at the time of the testing.

1. The sliced header images are not compliant. The images slices need null alt tags added. An alt tag appropriately describing the header image can be added to the main_pic_top6 image. This is applicable to all pages on the site using a similar graphic construction.
2. Site navigation violates 1194.22(O). Skip navigation functionality needs to be added to all pages.
3. The site is not compliant without the style sheet. Section 1194.22(D). The core site templates need to be rebuilt in conjunction with changes in the style sheet in order for the structure to hold together.
